

FRAGMENT GRIS / PEWTER / ROUGE / MARRON

PLEASE READ BEFORE INSTALLATION

This product needs to be sealed before installation because of the natural stone pieces intermixed with the glass. If desired, you may use an enriching sealer to produce a deeper color within the stone pieces.

For regular sealing purposes, we recommend using
AQUA MIX Penetrating Sealer.®

For color enhancing sealing purposes, we recommend using
AQUA MIX Enrich'N'Seal.®
