A decorative scene featuring a blue glass vase with eucalyptus branches on a wooden surface against a wall of large, square, light-colored tiles. The tiles have a subtle, mottled texture and are arranged in a grid pattern. The vase is made of translucent blue glass and contains several stems of eucalyptus with round, green leaves. The entire scene is set on a dark brown wooden surface.

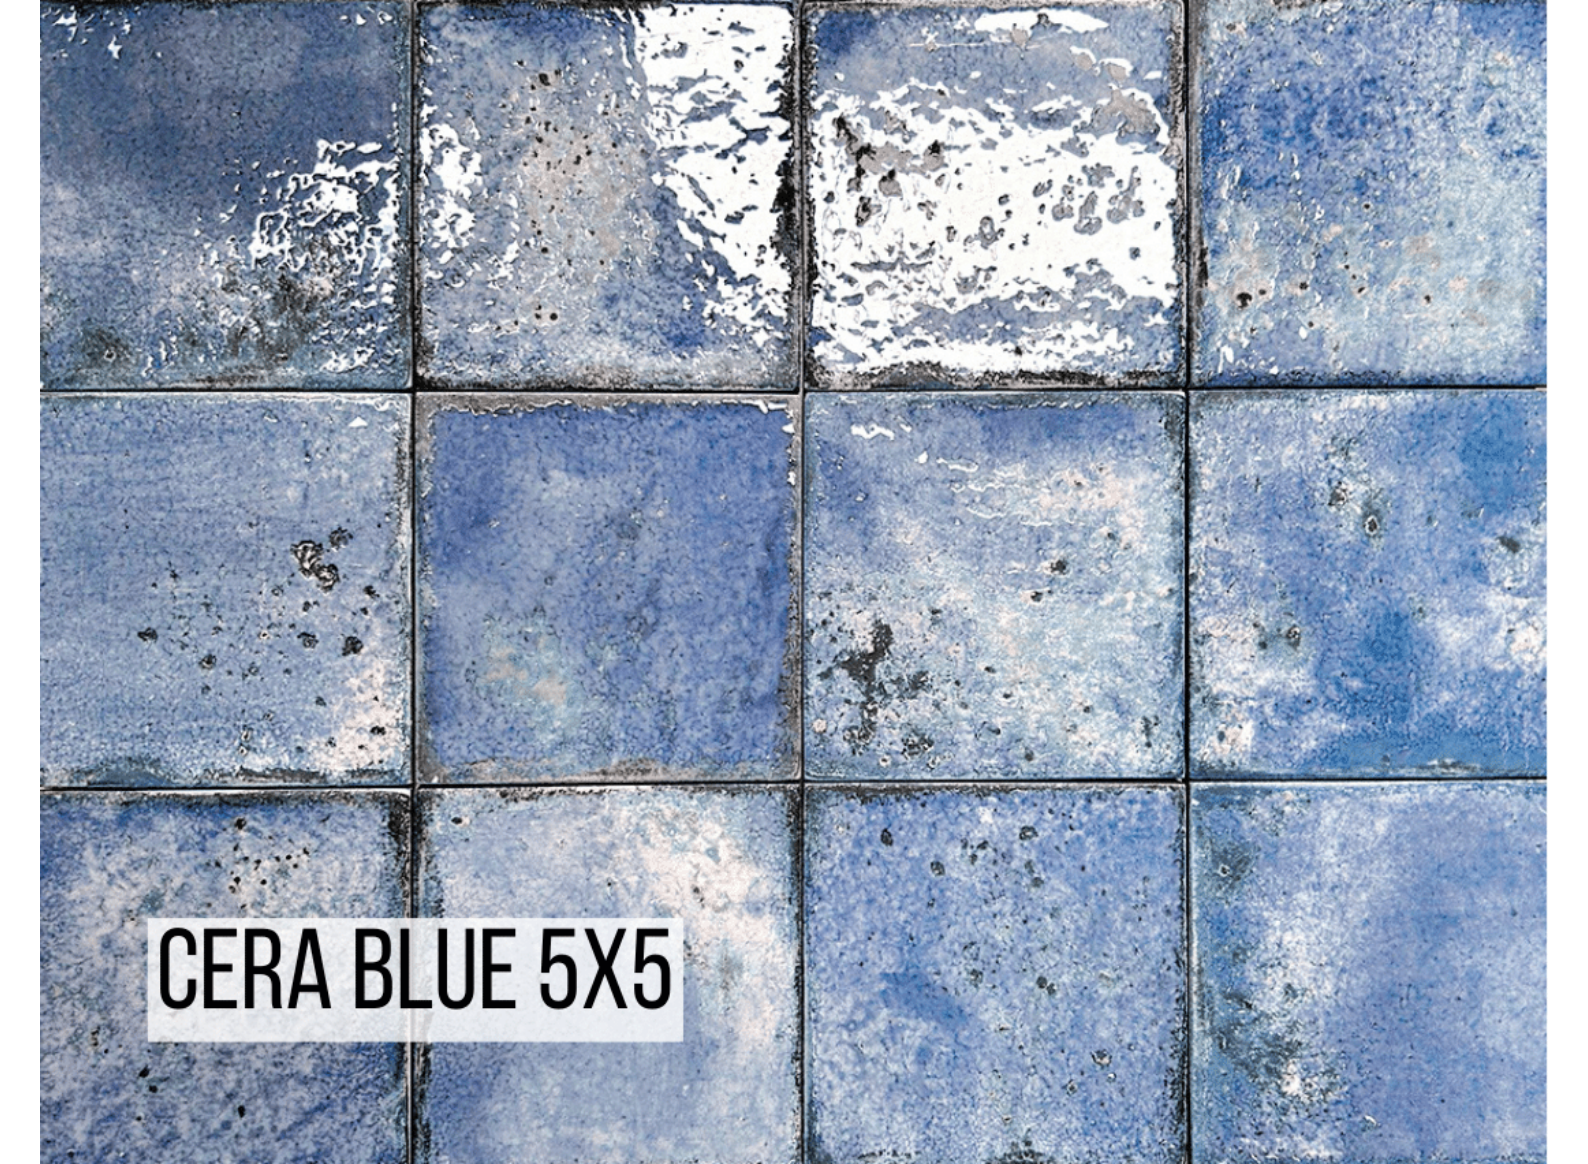

CERA WHITE 5X5

An outdoor shower stall is shown, featuring a wall and floor made of square blue tiles with a distressed, weathered texture. The wall is covered in a grid of these tiles. A chrome shower fixture is mounted on the wall, including a large overhead showerhead and a handheld showerhead on a sliding bar. To the left of the showerhead, a small chrome shelf holds two green bottles of soap. The shower is set against a white corrugated metal fence. To the right of the shower, there is a large green bush and a tall grassy area. The sky is clear and blue.

The image shows a close-up of a wall or floor covered in rectangular ceramic tiles. The tiles are a deep teal or slate blue color with a highly textured, distressed finish. The surface of each tile is uneven, with darker blue and black spots, as well as some lighter, almost white, areas where the glaze has worn away, revealing a rougher material underneath. The tiles are laid in a traditional running bond pattern, with horizontal joints visible across the rows. The lighting is somewhat uneven, highlighting the texture and the variations in the tile's color.

CERA TEAL 2.7X11

The image shows a close-up of a wall or floor covered in square ceramic tiles. The tiles are a deep teal or turquoise color, but they have a distressed, aged appearance. There are numerous small, light-colored spots and larger areas where the teal glaze has worn away, revealing a lighter, off-white or cream-colored substrate underneath. The tiles are arranged in a grid pattern, with dark, possibly brown or black, grout lines separating them. The overall texture is rough and uneven.
